

What describes you best amongst the following?

Do you run the eduroam service?

As an NRO admin, I

Which eduroam related topics would you like to see dealt with in future sessions?

I'm just observing (to keep abreast of eduroam progress in Africa)

Monitoring and visitor access

African Managed IdP

eduroam for end users

installation and configuration

Monitoring and Visitor access

Monitoring & Visibility

How to Interconnect more providers with their local eduroam servers

Technical requirements for becoming an NRO

Which eduroam related topics would you like to see dealt with in future sessions?

monitoring eduroam databases

more about technical issue

Dealing with commercial ISPs

Federated Identity Management

Monitoring, Installation and Configuration

Monitor and visitor access

Connection via LAN, eduroam vLAN, eduroam monitoring

User authentications databases that best work with eduroam

Who ends up paying for it? I think your speaker said 'its free for now'

Which eduroam related topics would you like to see dealt with in future sessions?

none

eduroam LAN Connection

none

Eduroam connection throughout the different regions when you are travelling

eduroam monitoring

The future of eduroam

Validating eduroam security

The Configuration and deployment of eduroam

Managed IdP

Which eduroam related topics would you like to see dealt with in future sessions?

CUI and more information on fticks. Would also like more information on using freeIPA/ldap database backend to authenticate windows users using MsCHAPv2. Finally using certificates when logging in, I usually have to select 'Do not validate'

Monitoring

I am ok

Certificate sharing between Radius server

CUI, MSCHAPv2, and certificates

I am ok
