Building resilient DNS Infrastructure and Introduction to DNSSEC

Monday, 10 October 2016 - Friday, 14 October 2016

Ouagadougou, Burkina Faso

Tracks

Campus Networking Design and Best Practices

Campus Networking Operation Refresher

Building resilient DNS infrastructure

This track will discuss the concept of DNS, configuring nameservers, managing forward and reverse zones, and basic security mechanisms.

DNS Security / DNSSEC

This track is an introduction to DNS Security / DNSSEC concepts, configurations, and operations. It will discuss authentication of transactions and integrity of DNS data. Participants will be involved in exercises to delegate trust to public keys of third parties
