MEDALLION'S NEXT PHASE OF INDUSTRY IMPACT – BUILDING NATIONAL RELIABLE LOCAL CLOUD INFRASTRUCTURE

Medallion has a national license for provision of interconnectivity services.

Medallion will Promote local content, broadband penetration, and hosting of contents

Medallion intends to offer services in no less than 6 cities by the end of 3rd quarter 2019.

The cities of operation will include: Lagos, Abuja, Port Harcourt, Enugu, Ibadan, Asaba, and Kano

This will result in localization of interconnection in Nigeria and lead to higher call quality and cheaper call rates.

The data centers to be built in these cities will get content closer to the end users ensuring better user experience and increase in patronage of the services of the telecom operators and content developers
